

I listen to KLOVE on a daily basis, and in fact financially support it because it is an integral part of our community. It would have a significant negative impact on the community if it were displaced by LPFM broadcaster. It is the only place I can find Christian music on the radio. There is no shortage of commercial radio with questionable messages. To have a positive message that KLOVE provides removed from the radio in the name of progress only shows the direction this country is heading. We need to do all we can to keep positive messages accessible for our us and our children.
